

Managing Stroke ASAP at the PSAP

Sophia Dyer, MD, FACEP, FAEMS
Associate Professor, Dept Emergency Medicine
Boston Univ. School of Medicine
Medical Director, Boston EMS

EMS and Stroke Neurology

In Stroke Care...

- EMS provides opportunity
- For recognition
- For access

How can we shorten the time to opportunity for the majority of Stroke patients?

- Prehospital entry notification-
STROKE ALERT
- How can the EMS system help with streamlining care in the hospital?

How about Dispatch?

- Call processing: added caller questioning
- Prior CVA, anticoagulants, family contact with cell
- Earlier registration
- Earlier stroke alert
- Earlier time to CT

Thank you for all who take the call!
