

# Why Not Pediatric CPAP

Robert Lowe MD FACEP FAEMS

# The Awakening Moment

# Indications for Pediatric CPAP

Asthma

Suspected Pneumonia/Sepsis

Bronchiolitis (RSV)

Cystic Fibrosis

Drowning

# What parameters did we place on Pediatric CPAP

- Age > 1 year or Basically if the Mask Fits
- Lower limit BP is 90 Systolic ( or for peds less than age 10 lower limit is  $70 + (2 \times \text{Age})$ )
- Not for croup

# How has it been used?

- 6 cases
- 3 of the 6 have been less than 1 year age.
- 5 Respiratory Distress, 1 Drowning
- An unexpected benefit using a large child mask on small adults
