

# Improving EMS Response With Great Dispatch !

Are Current Call-Taker  
Questions and 9-1-1  
Deployment Codes  
Accurate?

- \* James Augustine, MD
- \* Fire EMS Medical Director
- \* Lee County 911 Center

- \* Michael Feldman, MD PhD
- \* EMS/EMD Medical Director
- \* Toronto, Ontario

# EMS Measures

## Response Time Metrics

Call Processing Time - Time from 911 call receipt to dispatch

Turnout Time - Time from unit alert to wheels rolling; by unit, station, shift, call type

Travel Time - Time from wheels rolling to arrival on scene; by unit, station, shift, call type

Total Response Time (NFPA 1710/1720 compliance) - Time from 911 call to 1st unit arrival

First Unit On Scene Response Time - Tracks how quickly initial management can occur

## How About Accuracy of Medical Incident Dispatch?

## How can That be Evaluated?

# Our 911 Center Staff – Unhappy with Seizures - Card 12 Accuracy

APRIL 21, 2025 — APRIL 28, 2025

## Lee County Public Safety (FL)

### PowerEngage Activity

Engage has been hard at work keeping your citizens informed and collecting feedback on how your first responders are doing.

#### ACTIVITY

The rules engine has matched 2885 times! Take a look at some of the matches.

#### Here is some feedback from your community

Very concerned and very professional.  
Helpful quick and calm  
She was very thorough and kind  
She was really helpful and professional. Thank you for your service  
Very helpful

Very clear on instructions; while asking questions & professional  
Seamed to ask same questions several times. When firemen got here made kind of a joke about the fire.  
Very well spoken and quickly got the ambulance on call and to us  
She was very calm and efficient very professional please thank her for me  
She was awesome at a very difficult time. Professional with her questions and walked us through the correct procedure until first aid arrived. Thankyou Thankyou Thankyou ❤️

# Seizures Further Studied

- \* Seizures in 2024:
- \* Total 3700
- \* Seizure Plus Midazolam = 255
- \* Male = 130, Female = 125
- \* Improved = 220, Unchanged = 34
- \* Not a seizure, but still got Midazolam = 15
- \* Levetiracetam Candidate = 15 + 34
- \* SZ, Midazolam, and Nontransport = 3 (All good)
- \* SOURCE: CAD data (SQL queries on the database), and ESO data

# Seizure Plus Midazolam

**Age Less than 10 = 18**

**Teens = 12**

**Twenties = 43**

**Thirties = 45**

**Forties = 40**

**Fifties = 39**

**Sixties = 31**

**Seventies = 21**

**Eighties = 6**

**One dose = 186**

**Two dose = 54**

**Three dose = 12**

**Four dose = 3**

# Seizures in 2024

Alpha	776
Bravo	199
Charlie	987
Delta	1738
Echo	0
Total	3700

- \* What do you Worry About on the 12 Card?  
34 Dispo = Cardiac Arrest
- \* 8 dispatched as ABC
- \* 174 Dispo = Stroke Alert
- \* 13 as Alpha, 6 as Bravo, 80 as Charlie, 75 as Delta
- \* 3 transported as Stroke by Helicopter

# Pieces of Data - 911 System

- \* **Age**
- \* **Gender**
- \* **Initial Patient Acuity**
- \* **Final Patient Acuity**
- \* **Disposition**
- \* **Hospital**
- \* **Loaded Mile**

# Pieces of Data – Patient Care Report

- \* **Chief Complaint**
- \* **Stroke, Cardiac, Sepsis, OB Alert**
- \* **Primary and Secondary Impressions**
- \* **Treatments**
- \* **Additional Clinical Details – Medical History, Response to Treatment**

# Pieces of Data – Hospital

- \* Arrival at ED
- \* ED Disposition
- \* Hospital Disposition
- \* Additional Clinical Detail from ED
- \* Additional Clinical Detail from Hospital

ESO HDE

# Questions that Would Help on Card 12?

- **Does this Patient Have a History of Seizures? What Usually Stops Them? = Low Acuity**
- **Does this Patient Have a History of Brain Cancer? = High Acuity**

# Quality Improvement

## **Sources of Raw Material in 911 Center Evaluation**

- ePCR audits/reviews (software or manual)
- Protocol/policy variations
- Patient or family feedback (Pt Engagement Surveys)
- Employee feedback
- Hospital feedback
- Hospital Data Exchange
- State EMS Bio-spatial dashboard

# ►► Quality Improvement in Emergency Medical Dispatch

- In EMD, no perfect precision is possible
- EMD is a massive public health exercise
- What is the standard of care in the rest of the health care system?
  - Missed MI rates
  - PERC rule for PE
  - PECARN rule for pediatric head injury
  - Societal risk tolerance
- If we accept MPDS (or any other dispatch protocol) as the standard for our community, we have a comparator

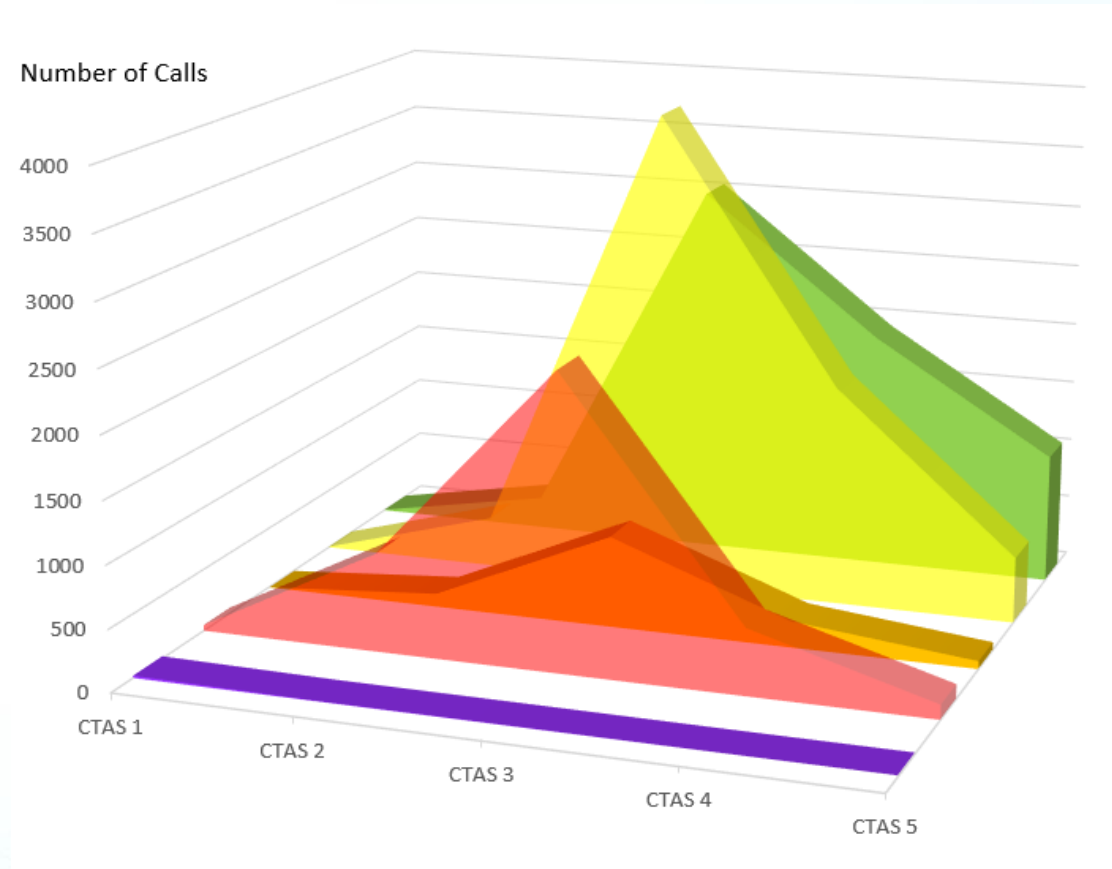

## Example: Protocol 17 (Falls)

### All Calls

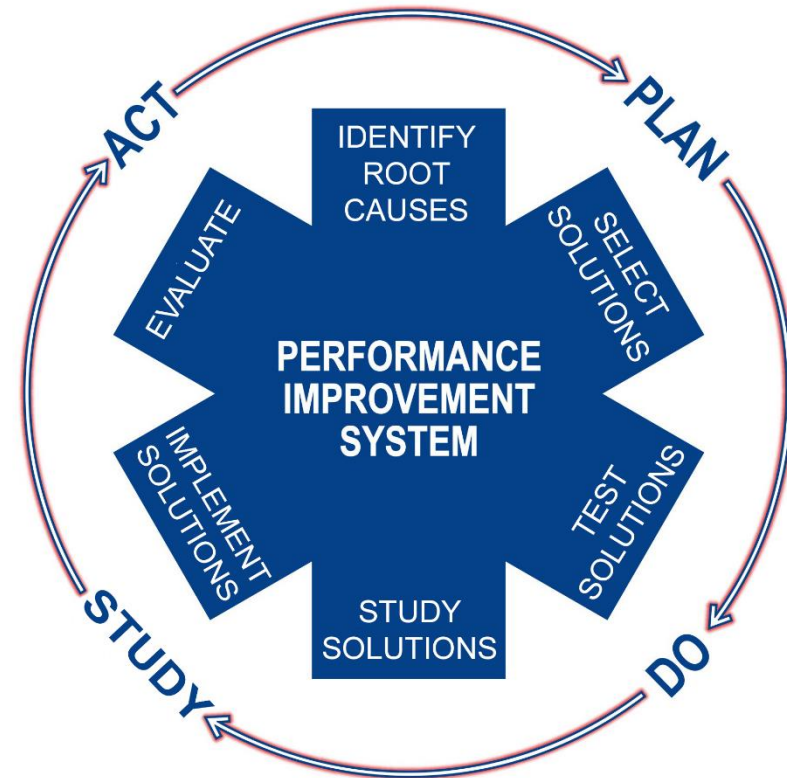

### Falls Only

# Quality Improvement Systems

# Open Discussion

Call Takers and Dispatchers do a Great Job!

- Modern Data Systems can be Integrated to give Helpful Insights, especially in busy systems
- Quality Improvement needs to utilize 911 and EMS data, and also ED and hospital outcomes
- Some Cards are by Nature less Accurate
- Keep Looking for Better Questions
